

**Proposed Redistricting Plan P1**  
Submitted by Ron Hoffman

The proposed plan accomplishes the following by focusing on geographic areas and communities of interest:

- All districts are reasonably compact
- 10 previously split unincorporated communities are united within a single district
- 19 previously split City of Los Angeles communities are united within a single district
- 3 previously split cities are united within a single district

The proposed plan creates compact districts that maximize community unity results in:

- More efficient, effective and fair representation for district residents
- Enhanced opportunities for voters of all Department of Justice race/ethnic categories

With the suggested revisions listed below:

- All 89 unincorporated communities would be united within single districts
- 87 of the 88 cities would be within single districts
- 68 of the 73 communities in the City of Los Angeles would be united within single districts

*Suggested revisions to P-1 to eliminate split unincorporated communities and city*
